PROFILE

The Texas Military Department relies on contributions as a Data Processor for Operation Lone Star, where efforts focus on managing detailed reporting for border activity and coordinating communication among over 1,200 personnel in the Del Rio Sector. Proficiency in communication protocols enhances operational response times and supports collaborative team efforts.

Army National Guard benefits from technical leadership in maintaining satellite communication systems, including earth terminal complexes and associated equipment. Academic pursuit of an Associate of Science at Dallas College complements hands-on expertise, reinforcing a commitment to operational excellence and organizational success.
